

JUST IN TIME

HUMAN TRAFFICKING RECOGNITION & RESPONSE

Help providers *recognize* and respond when the moment *matters most*.

A mobile-first tool that gives healthcare teams immediate access to human trafficking indicators, response steps, localized resources, and audience-specific support pathways.

Built with Justice U expertise

Powered by Viision technology

For providers, patients & communities

THE RECOGNITION GAP

There are over **1 Million** victims of human trafficking in the US.

Even though **90%** of victims are seen by healthcare providers up to **15–17x**, fewer than **1%** are identified.

AND HERE'S WHY

The recognition gap, broken down

1

Providers are uncertain about the INDICATORS

They are already seeing the signs. They just don't know if it is trafficking or not.

2

They don't know the PROTOCOL

to activate or follow in their local healthcare setting, and...

3

They don't know the LOCAL RESOURCES

in their community they can call on to provide additional support.

THE CRITERIA

Human trafficking response cannot depend on *memory, timing, or luck.*

Always available

Guidance and resources have to be accessible the instant a provider needs them — not buried in a binder or LMS.

Audience-specific

Providers, patients, and community members each need a different response pathway, surfaced in the right context.

Locally relevant

Resources and referral options must reflect the community where care is being delivered.

Low-friction

No app downloads, no logins, no integrations — adoption must be effortless across roles and shifts.

THE SOLUTION

Training + In-the-Moment Guidance, *Just In Time*

Just In Time extends world-class training into real-world care by leveraging patented, mobile technology to enable immediate access to indicators, protocols, guidance, and local resources.

HOW IT WORKS

01 — Scan

A QR code or smart link, discreetly placed in care settings, gives the user instant access — no app, no login.

02 — Recognize

Audience-aware guidance surfaces the right indicators, conversation prompts, and response steps for the moment.

03 — Respond

Local resources, referral pathways, and safety planning are delivered with measurable engagement and analytics.

HOW IT'S ACCESSED

Discreetly placed where care is delivered

Where: Posted on signage in exam rooms, restrooms, intake areas, and partner organizations. Shared via care hand-offs and outreach materials.

Who: Scanned by providers, patients, and community members. No app download, no login required.

Proven results.

“Just In Time is transforming the way health care systems respond to human trafficking.”

— US CHAMBER OF COMMERCE

CASE STUDY IMPACT STATS

783%

INCREASE IN CONFIDENCE

when working with patients
suspected of human trafficking.

91%

AWARE OF PROTOCOLS

for addressing potential
trafficking cases.

182%

INCREASE IN READINESS

to connect potential victims with
community-based organizations
for additional support.

“We found that providers often sensed something was wrong, but didn’t know what to say, what signs mattered most, or what to do next. Just In Time changed that immediately. It was easy to deploy, simple to access, and gave staff real support in the moment care was happening. In the very first week, staff began identifying cases and felt empowered in situations that previously felt overwhelming.”

— AMY BOGUE, CEO, ALLEGRO FAMILY CLINICS

COMMUNITY IMPACT & REACH

Extend trusted guidance *beyond your walls.*

The same patented QR code or smart link can support providers, patients, and the broader community — delivering the right guidance, training, indicators, instructions, and local resources to each audience instantly.

Organizations can expand awareness and preparedness without exposing internal protocols, adding implementation burden, or requiring app downloads.

01 — Patient Support

Private, immediate access to help, local resources, and safety planning.

02 — Community Awareness

Shareable education that helps communities recognize risks and respond earlier.

03 — Response Guidance

Clear indicators, conversation guidance, and response instructions available in the moment they are needed.

HOW IT'S DISTRIBUTED

Discreetly placed and organically shared

Where: QR codes on signage inside restroom stalls and private spaces, awareness campaign materials, provider hand-offs, community events, partner organizations, and outreach flyers.

Who: Scanned discreetly by patients and community members, and shared organically by providers, advocates, and neighbors — no app download, no login.

System-wide *preparedness* without system-wide complexity.

A scalable response infrastructure designed to extend preparedness, guidance, and community impact across organizations and into communities — without adding operational complexity.

Risk Reduction

Consistent, in-the-moment guidance helps reduce uncertainty, improve response consistency, and lower organizational exposure.

Operational Leverage

Extend trusted training and response support across departments, teams, and community-facing staff without increasing administrative burden.

Workforce Preparedness

Anyone interacting with a patient may recognize indicators. Just In Time helps teams respond with shared guidance and trusted response pathways.

Measurable Engagement

Track access, utilization, engagement patterns, and resource interaction across audiences and locations.

Lightweight Implementation

No app deployment, EHR integration, or PHI storage — reducing the cost, delay, and complexity of traditional implementations.

Compliance & Readiness

Supports training, preparedness, and response readiness initiatives with accredited education and in-the-moment guidance.

BUILT TO DEPLOY AT SCALE

Lightweight to launch. Ready for the enterprise.

Lightweight Deployment

- Guided implementation
- No app deployment
- No EHR integration
- No PHI storage

Enterprise Ready

- Fully white-labeled
- Multi-site & multi-tenant ready
- Supports providers, patients, and public audiences simultaneously

Community Scale

- Patented multi-language delivery
- Localized branding and messaging
- Deployable across systems and community settings

LET'S TALK

Give your teams the right guidance *before the moment is missed.*

Let's talk about how Just In Time can help your organization move from awareness to action with mobile-first guidance, audience-specific support pathways, and measurable engagement at the point of need.
